WORLD SOCIAL FORUM OF TRANSFORMATIVE ECONOMIES

ANOTHER WORLD ALREADY EXISTS!
**What is WSFTE?**
The World Social Forum on Transformative Economies (WSFTE) is a meeting place of alternatives to the current system. Unlike capitalism, which seeks to profit, transformative economies put people, life and the environment at the centre of our activity. We are the feminist economies, agroecology and food sovereignty, social and solidarity economy and the common (rural, urban and digital spaces). We have two movements that cut across all of us: education and public policy.

**Where do we come from?**
In response to the economic, political and social impacts of capitalism, the World Social Forum (WSF) was born in 2001 with the desire to create a more just system. Twenty years later, transformative economies have built this other world. Until now, therefore, we have walked separately, but the global climate, social and health emergency forces us to walk together to be stronger in co-creating alternatives to the current model. That is why, in 2016, at the Quebec WSF, it was decided to create the WSFTE and in 2018, in Salvador de Bahía, that the host city would be Barcelona, in recognition of its cooperative tradition.

**Participate**
Beyond the days of the FSMET, we are an ongoing process that we started working on two years ago. Currently, the Coordinating Committee - the political body of the Forum - is formed by more than twenty international networks and the confluence of Barcelona. We want to define a common global agenda to strengthen and promote alternatives to the current system.

In order to be stronger and more resilient, we want to involve as many transformative actors as possible. Do you share our dream? Join the WSFTE! You can get involved from today in the On-line Forum https://forum.transformadora.org/ where you can join thematics or local confluences, Work Commissions or movements of transformative economies.

**Join WSFTE! We want to hear your voice! We want walk with you!**
